

# CLIMATE SYSTEMS

Saving on energy costs through efficiently engineered HVAC systems is a major factor in our climate installations.

## Climate Systems

We produce our climate systems custom made in various types and sizes. Development and production which is based on our experience gained over many years, are done in our factory. For production of our climate systems, we only use high quality materials.

Every climate system is designed according to your specific local requirements such as:

- Room size
- Outside temperatuur/RH
- Height according to sea level

Climate systems installed by our skilled mechanics guarantee a long life time.

# LIMBRACO

Because of there state-of-the-art design, our climate systems reach very high energy efficiency levels. Without compromising on a perfect climate in your growing rooms.
