

# HYDRAULIC PICKING TROLLEY HT.100.

Picking mushrooms is easier, faster and last but not least, much safer with the Hydraulic harvesting lorry HT.010

## Hydraulic harvesting trolley HT.010

The hydraulic harvesting trolley is specially designed for the fresh mushroom industry. Powered by a 24V electromotor in combination with the hydraulic pistons for lifting the platform, we've built a state-of-the-art picking device which is already being used by customers all over the world.

The HT.010 trolley will boost productivity and quality. Easy and safe transport into and out the growing room by means of a specially designed transport mechanism. The platform is adjustable in height, the first and second bed level will be picked sitting down. Access gate can be performed as a slide or swing gate, dimensions and picking tray is adjustable to customer demand. Control keyboard is provided with a display for actual speed and battery capacity.

Slide or swing gate, dimensions and picking tray adjustable to customer demand. Depending on your requirements, many options are available.
